Re: FY 2023 Appropriations Recommendations Related to Strengthening the Addiction Service Workforce

Dear Chair Murray, Ranking Member Blunt, Chair DeLauro, and Ranking Member Cole,

The undersigned mental health, substance use disorder, and healthcare professional organizations in the Coalition to Stop Opioid Overdose (CSOO) are writing today to urge your support for the increased funding of important addiction prevention, treatment, harm reduction, and recovery support programs aimed at strengthening the addiction service workforce in Fiscal Year 2023. CSOO is a coalition of diverse organizations representing health care and social service professionals and advocates united around common policy goals that will lead to meaningful and comprehensive policies to reduce opioid-related overdose deaths.

While we are grateful for the mental health and addiction investments contained in the recently enacted Consolidated Appropriations Act, 2022, more must be done. More than 41 million Americans aged 12 or over needed treatment for substance use disorder (SUD) in 2020, but only a small fraction received any form of treatment for SUD.¹ Without certain strategic investments, this gap will never close and many more lives will be lost. Critical funding is needed now, more than ever, due to the COVID-19 pandemic, to increase the ranks of a qualified, well-trained SUD workforce and increase equitable access to evidence-based prevention, treatment, harm reduction, and recovery support services.

Building a robust SUD workforce is critical and should be a cornerstone of any federal response to the opioid overdose epidemic. In its 2017 report, the President's Commission on Combating Drug Addiction and the Opioid Crisis stated: "Adequate resources are needed to recruit and increase the number of addiction-trained psychiatrists and other physicians, nurses, psychologists, social workers, physician assistants, and community health workers and facilitate deployment in needed regions and facilities." The 2020 National Drug Control Strategy echoes this workforce need citing "[a]dditional efforts must be made to build an addiction medicine

infrastructure and expand the addiction profession and peer recovery support services workforces.”² Both the Health Resources and Services Administration (HRSA) and the Substance Abuse and Mental Health Services Administration (SAMHSA) have recognized that access to SUD treatment providers is insufficient.³ Without a larger SUD workforce, far too many people seeking remission and recovery from addiction will continue to lack access to care.

The programs detailed in our attached document of appropriations recommendations support CSOO’s mission to reduce opioid-related overdose deaths by increasing the addiction treatment workforce, bolstering prevention and harm reduction efforts that help reduce the negative health consequences of drug use, and increasing access to high-quality treatment and support services. By advancing sustainable, comprehensive public policies and expanding federal investment throughout our health care system for SUD, we will move closer to a future where all Americans living with addiction receive the high-quality care they need and deserve. To this end, as you consider how best to appropriate federal funding for FY23, the undersigned members of CSOO respectfully request that you incorporate the attached recommendations related to strengthening the addiction service workforce into the FY23 Labor-HHS appropriations bill.

Sincerely,

American College of Medical Toxicology

American Foundation for Suicide Prevention
